

SUBWAY CAR

ULTRAVAPOR DEMONSTRATION RESULTS

March 2006

Floor suction tool easily removes soil from subway's linoleum floor. Vapor melts away oils and greases, nylon agitation strip breaks up any encrusted dirt and suction removes all soils and moisture leaving floor clean and dry.

Checker plate entrance cleaned to as new appearance using vapor and a brush tool. Note cleaned area is dry.

7 CM suction tool used to clean and sanitize upholstery on passenger seats. Low moisture allows seats to be left dry while the high temperature sanitizes and deodorizes.

UltraVapor easily cleans aluminum skin of train using minimal water and chemical.

Easily clean g windows both inside and out leaving a streak free finish.

Other applications:

- Detailing drivers area including dash and instrument controls. Remove dust, dirt and grime quickly.
- Clean, sanitize and deodorize driver seats—seats are left dry and ready for immediate use.
- Clean ceilings, heating/air-conditioning vents, fans, etc
